Re: Information on the termination of production and sales

Dear Sir or Madam

Thank you for your continued patronage to our Molding compounds.

We would like to express our sincere gratitude for your continued support.

We would like to inform that we have decided to terminate the production and sale of the no-ammonia phenol resin molding compounds for bobbins, which has been patronized for many years, due to the following circumstances.

We would like to appreciate for your patronage and understanding.

1. Subject products

"Standlight"; no-ammonia phenol resin molding compounds
CP-J-8800 series / CP-J-8700 series / CP-J-8600 series / CP-J-8500 series /
CP-J-NAF series, etc. Please refer to the next page for detailed products.

2. End time of production and sale

Orders received by the end of May 2022, production in June 2022

3. Reason for discontinuation of production and sales

- ① We cannot continue to produce our no-ammonia phenol resin molding compounds because of the production termination of main raw material, phenol resin (resole resin) at our supplier.
- ② We evaluated alternate no-ammonia phenol resins supplied from other companies, however, price, processability and properties were insufficient to our target.
